- Developing back-end applications using Node.js and Express.js.
- Designing and developing APIs.
- Working alongside graphic designers for web design features.

## Skills

Following are some of the skills that I have a complete grip on while working with projects.

Html5 | Css3 | JavaScript  | React js  | Redux Toolkit  | Tailwind Css  | Node js | Express js | Mongo DB | GitHub | Next js | AWS S3 |

## Projects

### **Task Tracker** | MERN stack

Developed a task tracker web application using the MERN stack. Enabled users to create, update, and delete tasks. Implemented user **authentication JWT**. Ensured a responsive and user-friendly UI.

### **Order Management System** | MERN stack

Developed a fully responsive MERN stack order management system used to Add orders from different marketplaces like Amazon, ebay, walmart by different authenticated users and then update the order from frontend also integrated **FedEx Api** to track the orders packages and mark as complete delivered or still in transit. Also charts are integrated in the admin panel so the admin can have a view of sales and shipping costs on a daily basis.

**Source Code:** <https://github.com/AkaAbdullah/plexi2.0>

**Demo:** <https://fabplexiv-2.netlify.app/>

### **E-Commerce Store** | MERN stack

Developed a fully functional E-commerce store with **Admin panel** where the admin care create read update delete products and manage orders by showing the order info to the end customer by updating the order status like shipped, in transit, or canceled order
