ABOUT ME

REACT JS WEB DEVELOPER

Lahore Pk
I am a React JS web developer with a little familiarity with Node JS. I am also proficient in the Python Django web framework. I am a team player with strong communication skills. I am passionate about building user-friendly and engaging web applications.

PROJECTS

TASK TRAKER | MERN STACK

Developed a task tracker web application using the MERN stack. Enabled users to create, update, and delete tasks. Implemented user authentication.

Ensured a responsive and user-friendly UI.

FACIAL REACOGNATION ATTENDANCE SYSTEM (FYP) | Python Tkinter

Desktop Application based Facial recognition attendance system the Application has an admin panel with all validations. The admin login and add users to the database and captures images from the web camera then the model is trained and when the user marks attendance the app uses camera and identifies the person and automatically saves the record in the database with time and date also creates excel file and can be uploaded to cloud storage within application
