PROFESSIONAL SUMMARY

Detail-oriented [Vue.js](#) and React.js Developer with over 2 years of experience in designing and developing scalable web applications. Specialized in creating dynamic user interfaces and optimizing application performance. Proven ability to deliver enterprise-level solutions across various sectors, including e-commerce, real estate, and educational technology.

TECHNICAL SKILLS

- Frontend Technologies: React.js, Redux Toolkit, JavaScript, Vue3, Nuxt.js, HTML5, CSS3, Tailwind CSS, Material-UI
- Tools & Technologies: Git, GitHub, RESTful APIs, Agile/Scrum methodologies
- Other Skills: SEO best practices, UI/UX design principles

PROFESSIONAL EXPERIENCE

Frontend Developer

Earn Flex November 2024 - Present

- Working on SAAS products.
- Created a Dynamic Dashboard for companies using services.
- Implemented feature for tracking employees and jobs on maps.
- Used latest technologies like Nuxt and vue 3 for better server side rendering and less response time creating better user experience.

React.js Developer

Tx Dynamics | July 2024 - November 2024

- Designed and developed reusable components and user interfaces for a car purchase and sale website, enhancing user engagement.

- Integrated RESTful APIs to improve functionality and user experience, resulting in a 30% increase in user satisfaction.
- Completed multiple projects in the education and medical sectors, utilizing the latest tools and technologies to meet client needs.
- Collaborated with cross-functional teams to ensure project milestones were met on time and within budget.
- Currently developing a cross-platform mobile application using React Native for an e-commerce platform.

React.js Developer

Desert Game Studios | Aug 2022 - Nov 2023

- Participated in all stages of the software development life cycle, including initial analysis, implementation, integration, testing, and debugging.
- Developed and implemented highly responsive user interface components using React.js, improving application performance by 25%.
- Collaborated in an Agile development environment, actively participating in daily scrums, sprint planning, and retrospectives.
- Conducted code reviews and provided constructive feedback to team members, fostering a culture of continuous improvement.
- Gathered user feedback through usability testing sessions, leading to iterative improvements in the application and increased user satisfaction.

React.js Intern

Scenarios | March 2022 - June 2022

- Contributed to a project in the communication sector, focusing on enhancing user experience and application functionality.
- Maintained a legacy codebase in Laravel, ensuring smooth transitions during the migration to React.
- Converted PHP websites to React while ensuring component reusability and adherence to coding standards.
- Implemented SEO best practices, improving site visibility by 45% and driving an increase in organic traffic.
- Optimized application performance by implementing lazy loading and code splitting techniques, resulting in faster load times and improved overall user experience.

EDUCATION

Bachelor of Science in Information Technology (**BSIT**)

University of Education | 2017 - 2022

CGPA: 3.4/4.0

Final Year Project:

[Facial Recognition Attendance System](#)

- Developed a desktop-based application to mark attendance using web cameras for capturing images and training models.
- Technologies used: Python, OpenCV, Firebase, Pandas, Tkinter.

Projects

1- [Carnet](#)

A car sale and purchase platform for the car dealers having more than 7 modules built from scratch containing sales partner admin investors sub-investor car inspection multiple sales partners can join and buy a single car and can add investors and sub investors to invest in car site also contains module which is specific only for the inspection of cars even they are listed or not.

2- [Bedwork](#)

A marketplace for furniture and office built from scratch inspired from linkedin where users can have their personal profile as well as a company profile related to furniture. A news feed section which provides updates from users as well as companies

3- [Work4UTutor](#)

Work4U-Tutor. This platform connects students with expert tutors from around the world. The Tutor as well as students can sign up with the website.

3- [ScripID](#)

A simple Static Website which simply provides information about their company founders and their goals. It's basically a mobile application like foodpanda but it delivers medical related services. In this project I have built this from scratch and implemented some API's for subscription of newsletter and contact forms.

4- [Teltik](#)

Website related to communication sector providing telecom services data and plans for the users converted this website from php to react and maintaining the components reusability and application performance.
